

Firefly Heat Outputs based on Delta T 50

Vertical Panel Radiators: Size and Output Specifications

| Height | | 500mm | |
|---------------|--------|--------------|------|
| inches | | 20" | |
| Length | | OUTPUT | |
| mm | inches | Watts | BTU |
| 1600 | 63" | 1410 | 4811 |
| 1800 | 70" | 1586 | 5414 |
| 2000 | 79" | 1763 | 6016 |

Heat Outputs are based on a Delta T of 50.

| Height | | 600mm | |
|---------------|--------|--------------|------|
| inches | | 24" | |
| Length | | OUTPUT | |
| mm | inches | Watts | BTU |
| 1600 | 63" | 1627 | 5551 |
| 1800 | 70" | 1830 | 6244 |
| 2000 | 79" | 2033 | 6938 |

Heat Outputs are based on a Delta T of 50.

Conversion factors

| Delta T | Factor | Delta T | Factor | Delta T | Factor |
|----------------|---------------|----------------|---------------|----------------|---------------|

| 28 | 0.469 | 47 | 0.922 | | |

For systems not operating at Delta T 50 the conversion factors in the table above may be applied to ascertain the output of a particular radiator. To convert from Delta T50, multiply the Delta T 50 output value by the appropriate factor as per the table.

To convert an output value from another known Delta T to Delta T 50, divide the value by the appropriate factor of the known Delta T value.
